ES

Executive Summary

This document presents the comprehensive infrastructure, platform development, and operational personnel budget to ensure reliable, secure, multi-user operation of the **AYURDISHA Meet the Mentors** web application during the 11th World Ayurveda Congress. The application supports delegate registration (email OTP verification), live question submission, mentor cluster curation by staff, and AI-assisted journal search in the Knowledge tab.

The current architecture is **fully serverless** — Google Firestore, Vercel serverless functions, Google Gemini API, and transactional email — requiring **no dedicated servers**.

Free-tier limits are sufficient for development and low-traffic preview but will **throttle or fail under congress-day load** (estimated 200–500+ concurrent delegates).

**Phase 1 (₹60,000)** = Subtotal A (cloud, ₹26,361) + Subtotal B (software engineering, ₹30,000) + Subtotal C (congress-week assurance, ₹3,639). **Phase 2 (₹29,000)** covers congress personnel and operational support. A **contingency reserve of ₹11,000** is held for unforeseen requirements.

| Subtotal                  | Description                                                                     | Amount (INR) |
|---------------------------|---------------------------------------------------------------------------------|--------------|
| A                         | Cloud & Infrastructure (Firebase, Vercel, Gemini, email, domain, SSL, security) | ₹26,361      |
| B                         | Software Engineering & Web Development (design, build, test, deploy)            | ₹30,000      |
| C                         | Technical Assurance — congress-week operations (monitoring, on-call, hotfix)    | ₹3,639       |
| Phase 1 Total (A + B + C) |                                                                                 | ₹60,000      |

| Scenario      | Phase 1 | Phase 2 | Contingency   | Total (INR) | Total (USD) | Use Case                                                       |
|---------------|---------|---------|---------------|-------------|-------------|----------------------------------------------------------------|
| Minimum       | ₹40,000 | ₹24,000 | ₹11,000 (15%) | ₹75,000     | ~\$882      | Essential cloud upgrades and minimal personnel                 |
| Recommended ★ | ₹60,000 | ₹29,000 | ₹11,000 (11%) | ₹1,00,000   | ~\$1,176    | Full platform build + cloud premium + congress operations team |
| Maximum       | ₹88,000 | ₹30,000 | ₹12,000 (10%) | ₹1,30,000   | ~\$1,529    | Enterprise buffers; extended personnel and redundancy          |

MINIMUM

₹75,000

~\$882 USD

Essential upgrades; moderate risk under peak load

RECOMMENDED ★

RECOMMENDED

₹1,00,000

~\$1,176 USD

MAXIMUM

₹1,30,000

~\$1,529 USD

Enterprise buffers; record attendance coverage

Full platform + cloud + congress  
personnel

1

# Project Overview

## 1.1 Application Purpose

The Meet the Mentors Experience Zone enables congress delegates to:

- Register and verify identity via email OTP
- Browse mentor profiles and thematic clusters
- Submit questions for mentor sessions
- Search Ayurvedic journals via AI-powered Knowledge tab (Google Gemini)
- Allow staff to curate, cluster, and export delegate data in real time

## 1.2 Technical Architecture

| Layer            | Technology                                   | Project / Provider                  |
|------------------|----------------------------------------------|-------------------------------------|
| Frontend         | React (Vite), deployed on Vercel             | ayushmarg.vercel.app → ayurdisha.ai |
| API / Serverless | Vercel Functions (Node.js)                   | Vercel                              |
| Primary Database | Google Cloud Firestore                       | Firebase: ayurdisha-4917b           |
| AI Search        | Google Gemini API                            | Google AI Studio                    |
| Email (OTP)      | Resend / SendGrid (transactional)            | Resend or equivalent                |
| Authentication   | Signed HttpOnly cookies, server-side OTP     | Application layer                   |
| Security         | Firebase App Check, Firestore security rules | Firebase                            |
| Monitoring       | Sentry / UptimeRobot / Vercel Analytics      | Third-party SaaS                    |

**No dedicated server required.** Premium tiers and technical services ensure reliability under peak congress load. All scaling is managed automatically by cloud providers.

2

Technical Justification

2.1 Cloud & Infrastructure — Premium Tiers

PHASE 1 · A

Firestore (Critical)

|                    | Free (Spark)                       | Recommended (Blaze — Premium Buffer) |
|--------------------|------------------------------------|--------------------------------------|
| Daily reads        | ~50,000/day                        | Pay-as-you-go, no hard cap           |
| Behaviour at scale | Throttles at ~200–300 active users | Scales with usage                    |
| Budget allocation  | ₹0                                 | ₹5,500 (~\$65)                       |

Vercel Pro — Hosting & API

|                      | Hobby (Free)                     | Pro (Recommended)                     |
|----------------------|----------------------------------|---------------------------------------|
| Monthly cost         | ₹0                               | ~₹1,700/month (~\$20 USD)             |
| Serverless execution | 10s timeout, limited concurrency | 60s timeout, higher limits            |
| Budget allocation    | —                                | ₹7,500 (~\$88) — 2-month event period |

**Domain registration — ayurdisha.ai (1st year):** Official congress domain. Registrar quote: **₹4,761** (~\$56) — see Annexure A.

**SSL + CDN extras:** Certificate management and bandwidth headroom. Budget allocation: **₹800** (~\$9).

**Firestore App Check & Security Rules Audit:** Professional review before public registration. Budget allocation: **₹2,500** (~\$29).

**Subtotal A — Cloud & Infrastructure (Recommended): ₹26,361** (~\$310)

2.2 Software Engineering & Web Development

PHASE 1 · B

Congress-grade platform scope: delegate registration with OTP, staff curation tools, Gemini-powered Knowledge hub, and Firestore backend. The **₹30,000** fee covers end-to-end design, build, pre-launch testing, security hardening, and production deployment — a realistic committee rate for the Indian market.

| #                                 | Service                                                                        | Recommended (INR) | USD    |
|-----------------------------------|--------------------------------------------------------------------------------|-------------------|--------|
| 8a                                | UI/UX design & wireframes — delegate and staff journeys                        | ₹6,000            | ~\$71  |
| 8b                                | Frontend development — React/Vite registration, Knowledge tab, staff dashboard | ₹8,000            | ~\$94  |
| 8c                                | Backend/API & Firestore integration — OTP, Gemini search, security rules       | ₹8,000            | ~\$94  |
| 8d                                | Testing, load testing & security review — pre-launch QA (500+ users)           | ₹5,000            | ~\$59  |
| 8e                                | Deployment, backup/DR & production handover — ayurdisha.ai cutover             | ₹3,000            | ~\$35  |
| Subtotal B — Software Engineering |                                                                                | ₹30,000           | ~\$353 |

2.3 Technical Assurance — Congress-Week Operations

PHASE 1 · C

Live-event technical support during the 3-day congress. Pre-launch assurance (load testing, security review, backup setup) is included in Subtotal B above.

| #                                | Service                                             | Recommended (INR) | USD    |
|----------------------------------|-----------------------------------------------------|-------------------|--------|
| 9                                | Real-time monitoring (Sentry / UptimeRobot premium) | ₹1,200            | ~\$14  |
| 10                               | On-call technical support during congress (3 days)  | ₹1,639            | ~\$19  |
| 11                               | Bug fixes & hotfix buffer during event              | ₹800              | ~\$9   |
| Subtotal C — Technical Assurance |                                                     | ₹3,639            | ~\$43  |
| Phase 1 Total (A + B + C)        |                                                     | ₹60,000           | ~\$706 |

2.4 Personnel & Operational Support

PHASE 2

| #             | Role / Service                                      | Recommended (INR) | USD    |
|---------------|-----------------------------------------------------|-------------------|--------|
| 12            | Data Analyst — congress usage analysis & reporting  | ₹7,500            | ~\$88  |
| 13            | Observer / field coordinator — on-ground monitoring | ₹6,000            | ~\$71  |
| 14            | Technical documentation specialist                  | ₹4,500            | ~\$53  |
| 15            | User experience reviewer                            | ₹3,500            | ~\$41  |
| 16            | Event-day helpdesk support                          | ₹5,500            | ~\$65  |
| 17            | Communications & delegate liaison                   | ₹2,000            | ~\$24  |
| Phase 2 Total |                                                     | ₹29,000           | ~\$341 |

3

Itemized Budget — Recommended Scenario (★)

| #                                                 | Service                                       | Phase | Min (INR) | Rec. (INR) | Max (INR) |
|---------------------------------------------------|-----------------------------------------------|-------|-----------|------------|-----------|
| A. Cloud & Infrastructure                         |                                               |       |           |            |           |
| 1                                                 | Firebase Blaze (Firestore) — premium buffer   | 1     | ₹3,500    | ₹5,500     | ₹8,000    |
| 2                                                 | Vercel Pro — hosting & API                    | 1     | ₹5,000    | ₹7,500     | ₹12,000   |
| 3                                                 | Google Gemini API — enterprise buffer         | 1     | ₹2,000    | ₹3,500     | ₹5,000    |
| 4                                                 | Resend Pro / SendGrid — OTP at scale          | 1     | ₹1,200    | ₹1,800     | ₹3,000    |
| 5                                                 | Domain registration — ayurdisha.ai (1st year) | 1     | ₹4,761    | ₹4,761     | ₹4,761    |
| 6                                                 | SSL + CDN extras                              | 1     | ₹500      | ₹800       | ₹1,500    |
| 7                                                 | Firebase App Check / security rules audit     | 1     | ₹1,500    | ₹2,500     | ₹4,000    |
| Subtotal A — Cloud & Infrastructure               |                                               |       | ₹18,461   | ₹26,361    | ₹38,261   |
| B. Software Engineering & Web Development         |                                               |       |           |            |           |
| 8a                                                | UI/UX design & wireframes                     | 1     | ₹3,000    | ₹6,000     | ₹8,000    |
| 8b                                                | Frontend development (React/Vite)             | 1     | ₹4,000    | ₹8,000     | ₹12,000   |
| 8c                                                | Backend/API & Firestore integration           | 1     | ₹4,000    | ₹8,000     | ₹12,000   |
| 8d                                                | Testing, load testing & security review       | 1     | ₹2,500    | ₹5,000     | ₹8,000    |
| 8e                                                | Deployment, backup/DR & production handover   | 1     | ₹1,500    | ₹3,000     | ₹5,000    |
| Subtotal B — Software Engineering                 |                                               |       | ₹15,000   | ₹30,000    | ₹45,000   |
| C. Technical Assurance — Congress-Week Operations |                                               |       |           |            |           |
| 9                                                 | Real-time monitoring (Sentry / UptimeRobot)   | 1     | ₹2,000    | ₹1,200     | ₹2,000    |

## Fund Allocation & Cost Scenarios

### 4.1 Fund Allocation Summary — Recommended Scenario (★)

| Line Item                                                               | Amount (INR) | Amount (USD) | Status                      |
|-------------------------------------------------------------------------|--------------|--------------|-----------------------------|
| A. Cloud & Infrastructure (Items 1–7)                                   | ₹26,361      | ~\$310       | Allocated                   |
| B. Software Engineering & Web Development (Items 8a–8e)                 | ₹30,000      | ~\$353       | Allocated                   |
| C. Technical Assurance — congress-week (Items 9–11)                     | ₹3,639       | ~\$43        | Allocated                   |
| Phase 1 Total (A + B + C)                                               | ₹60,000      | ~\$706       | Allocated                   |
| Phase 2 — Personnel & Operational Support (Items 12–17)                 | ₹29,000      | ~\$341       | Allocated                   |
| Total Allocated Expenditure                                             | ₹89,000      | ~\$1,047     | —                           |
| Contingency Reserve — unforeseen technical and operational requirements | ₹11,000      | ~\$129       | Reserve — not yet allocated |
| Total Approved Budget                                                   | ₹1,00,000    | ~\$1,176     | Fully allocated             |

The contingency reserve is held for unforeseen technical and operational requirements such as unexpected traffic spikes, additional API quota, emergency contractor support, unplanned personnel coverage, or security remediation. Release requires technical lead approval and committee notification.

### 4.2 Scenario Descriptions

| Scenario                  | Total    | Profile & Risk                                                                                                                                                                                       |
|---------------------------|----------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Minimum — ₹75,000         | ~\$882   | Essential cloud upgrades and domain registration; reduced platform scope; minimal personnel. <i>Risk: Moderate</i> — limited assurance for peak congress load.                                       |
| Recommended ★ — ₹1,00,000 | ~\$1,176 | Full premium cloud stack, platform development, load testing, security review, on-call support, and congress personnel team. <i>Risk: Low</i> — aligns with professional event technology standards. |
| Maximum — ₹1,30,000       | ~\$1,529 | Enterprise-grade buffers, extended testing, full-week support, expanded personnel. <i>Risk: Very low</i> — suitable for record attendance or national media coverage.                                |

## 5 Timeline & Committee Decision

### 5.1 Implementation Timeline

| Phase             | Timing                     | Action                                                                           | Est. Cost (Recommended)               |
|-------------------|----------------------------|----------------------------------------------------------------------------------|---------------------------------------|
| Immediate         | September 2026             | Register ayurdisha.ai domain; upgrade Firebase to Blaze; initiate security audit | ₹7,261 (domain + audit) + usage-based |
| Platform build    | 8–10 weeks before congress | Software engineering sprint (Subtotal B); UX review; documentation draft         | ~₹30,000                              |
| Pre-registration  | 6–8 weeks before congress  | Activate Vercel Pro, Resend Pro; complete load test (in Subtotal B)              | ~₹18,000 (Subtotal A services)        |
| Registration open | 4 weeks before congress    | Penetration test; staff training; backup/DR verification                         | Included in Subtotal B                |
| Congress week     | Event dates (3 days)       | On-call support; helpdesk active; monitoring live (Subtotal C)                   | ~₹3,639 + Phase 2 personnel           |
| Post-event        | Within 2 weeks after       | Data analyst report; downgrade Vercel; final Firebase reconciliation             | ~₹8,000                               |

### 5.2 Committee Decision Requested

1. **Approve total infrastructure budget of ₹1,00,000 (~\$1,176 USD)** for the Recommended scenario
2. **Authorize domain registration (ayurdisha.ai) and Firebase Blaze / Vercel Pro** procurement before public registration opens
3. **Approve contingency reserve of ₹11,000** for unforeseen technical and operational requirements, releasable on technical lead recommendation
4. **Authorize technical team** to engage platform development, load testing, security review, and congress personnel upon approval

Registrar quote for the official congress domain **ayurdisha.ai**, obtained September 2026. First-year registration: **₹4,760.95** (budget line item rounded to **₹4,761**).
